Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 02/13/2007 has been entered.

Response to Arguments

2. Applicant's response to the 35 USC 101 rejection is noted. The 35 USC 101 rejection mailed 11/28/2006 has been withdrawn because the claims meet the practical application test including but not limited to " b) updating the current state for said another simulated control terminal and c) displaying on said visual monitor the updated current state" as recite in claims 14 and 23 and/or disclosed in the specification.

Allowable Subject Matter

3. The following is a statement of reasons for the indication of allowable subject matter: Claims 14-23 are allowable because the prior art fails to disclose or suggest a method of testing a server for a video-on-demand (VOD), comprising in combination with the storing, displaying, performing a first manual step, responding immediately, performing a second manual step, responding immediately steps and a simulation model which allows an operator to manually control the simulation of the VOD system in real time and receive real time feedback regarding the results of the manipulation. Namely, the claimed limitation of repeatedly performing, by said operator, only said first and second manual steps in a sequence, in conjunction with applicant's arguments, asserts that the process occurs in real time and is not scripted ahead of time. The art of record relies upon preprogrammed scripts to perform a similar simulation.
